ABOUT US

Founded in 2003, **Atul Pipe Company** is a leading manufacturer and stockist of industrial pipes, valves, and fittings. With decades of experience and an unwavering commitment to quality and service, we have built a strong reputation among our clients in both the public and private sectors across India. We specialize in delivering a wide range of industrial piping products, ensuring durability, efficiency, and compliance with industry standards.

MISSION

- Deliver top-grade piping products with integrity and transparency.
- Build long-term partnerships through timely service and tailored solutions.
- Continuously upgrade our inventory and technical expertise to meet modern industrial demands.

VISION

To be a preferred and reliable partner in the industrial piping and flow control segment by consistently providing high-quality products and unparalleled service.

OUR PRODUCT RANGE

Short Bends

We manufacture short bends that are electronic resistance welded using the latest technology. These are composed of mild steel and carbon steel available in different dimensions as per ISI 1239 II and ANSI B 16.9 standards. These are available both in seamless & ERW pipes. Our short bends can be galvanized as per customer request.

Tees

Our tees are manufactured using mild and forged steel. These are available in a large variety of shapes, sizes and dimensions based on ISI 1239 II and ANSIB 16.9 standards. Our tees can be galvanized as per customer request.

Reducer

Our reducer are available in mild and carbon steel material that has found extensive application in diverse industries. We manufacture reducer in different dimensions as per the ISI and ANSI standards. These are available both in seamless & ERW pipes. Our reducer can be galvanized as per customer request.

British Standard Slip on Flanges

The British standard flanges manufactured by us pertain to all standards like BS10 1962 Table D,E,F,H IS 6392 Table 5,17,26 IS 1538 in slip. These are manufactured using mild steel both in slip-on and blind type which can be galvanized on customer request.

American Standard Slip on Flanges

These American standard flanges manufactured by us pertain to all standards like ANSI B16.5, ASA150LBS to 600LBS in slip. These are manufactured using mild steel both in raised face and blind type which can be galvanized on customer request.

Pipe Nipples

We manufacture nipples for piping assemblies that are available in both - mild steel and galvanized forms in different diameters and thicknesses. These pipefitting are used as an extension to any pipe assembly. These can be modified & galvanized as per customer requirement.

Carbon Steel Forged Fittings

We market V.S, Sant, BNM brand forged fittings that have threaded & socket weld type dimensions as per IS1239 Part II. These are manufactured using high quality carbon steel based on the specifications from ASTM A 105 standards.

Malleable Iron GI Pipe Fittings

UNIK GI fittings are meant for agricultural & water line purposes that are durable and efficient enough to sustain high load and pressure. These are available in ISI & heavy qualities as per IS 1879.

Industrial Valve Products

We market Sant, Kartar, Zoloto, LP & other prominent Brands designed and engineered with excellence our hardware and mill store products ensure high accuracy and high quality. They can withstand wearing and tearing guaranteeing a long life for themselves.

Butterfly Valve

Sluice Valve

Non Return Valve

Ball Valve

Stainer

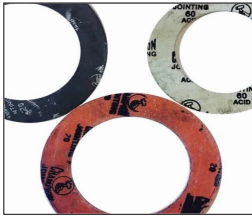

Foot Valve

Galvanised Clamps

We market various kinds of Clamps & Tie rods meant for holding of the pipe fittings systems. Our range includes Standard pipe clamps, U-Bolt clamps, Saddle clamps, Heavy duty clamps.

Rubber Gasket

We market Champion Brand Rubber Gasket used for various pipe fitting requirements.

Product Information

All our products are made as per ISI, ANSI and ASTM specifications that can cater to diverse industrial applications. We manufacture mild steel flanges, butt welded fittings, carbon steel forged fittings, malleable fittings, valves, hardware & mill store fittings. These fittings are manufactured using high quality metal that passes various durability tests. Different types of metals used by us for fabrication of fittings are listed below:

- Mild Steel • Forged Steel • Carbon Steel • Cast Iron • Gun Metal • Stainless Steel
